

Worksheet-1

Student Name: Tarush Aggarwal
Branch: MCA CC&DevOps
Semester: 2
Subject Name: Cloud Computing Lab

UID:21MCC2024
Section/Group: A
Date of Performance:19.02.2022
Subject Code: 22E-21CAP-686_21MCD-1_A

- 1. Aim/Overview of the practical:** Introduction to Google Sheets and Google Forms
- 2. Task to be done:**

Create Google Form and create Google sheet. On Google sheet, apply the Vlookup Formula.

Sol1.)

STEP1. Firstly we start with google form and now we go to google and write “**google form**” and we get the first link of google form and then we click on it .and then we get this type of interface.

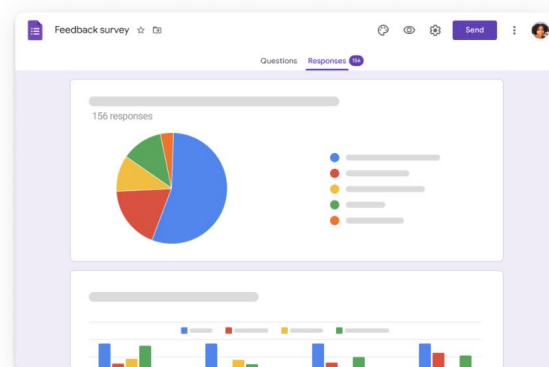

Get insights
quickly, with
Google Forms

Easily create and share online forms and surveys, and analyze responses in real-time.

STEP 6. This is my full form that give to my friends and my classmates to fill this form I get 34 responses on form . Now to check responses we have to go the responses tab .

Questions Responses **34** Settings

34 responses

Accepting responses

Summary

Question

Individual

Who has responded?

Email

shivamdhaka1200@gmail.com

saket.jain05se@gmail.com

razdeepthakur@gmail.com

kkmmishraa5@gmail.com

uic.21mcc2051@gmail.com

STEP 7. In this we check the responses according to our convenient as like we have see the full summary in which we data in graph form

Name

34 responses

Age

34 responses

STEP8. We see the responses according to our question we ask . We ask question as like “age”. as we select age from the dropdown . Now we see that 7 person have 22 age .

Summary	Question	Individual
<div>Age</div> <div>< 2 of 12 ></div>		
<div>Age</div>		
<div>22</div> <div>7 responses</div>		
<div>20</div> <div>6 responses</div>		

STEP 9. Next we see the response as like individual person .

Summary

Question

STEP10. Google Form give us one more facility we export our data in google sheets for easily share to anyone . Click on this sheet button automatically data transferred .

34 responses

Sol2,)

STEP1. Now we make the google sheets and apply the function VLOOKUP on it .First to open google sheet go on google type “ **google sheets**” get the first link then click on “ **go to sheet** “

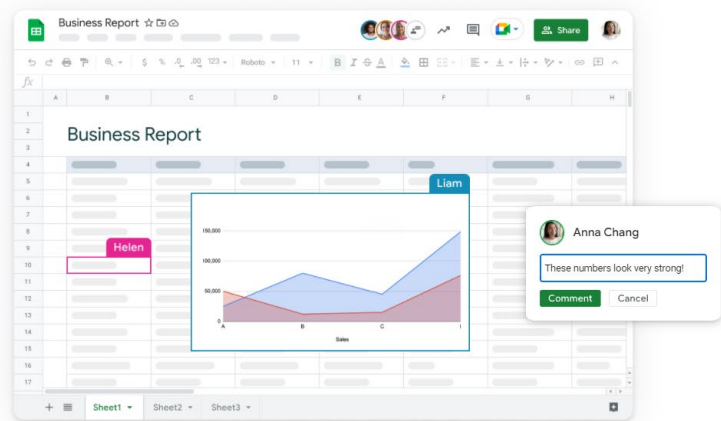

Make data-driven decisions, in Google Sheets

Create and collaborate on online spreadsheets in real-time and from any device.

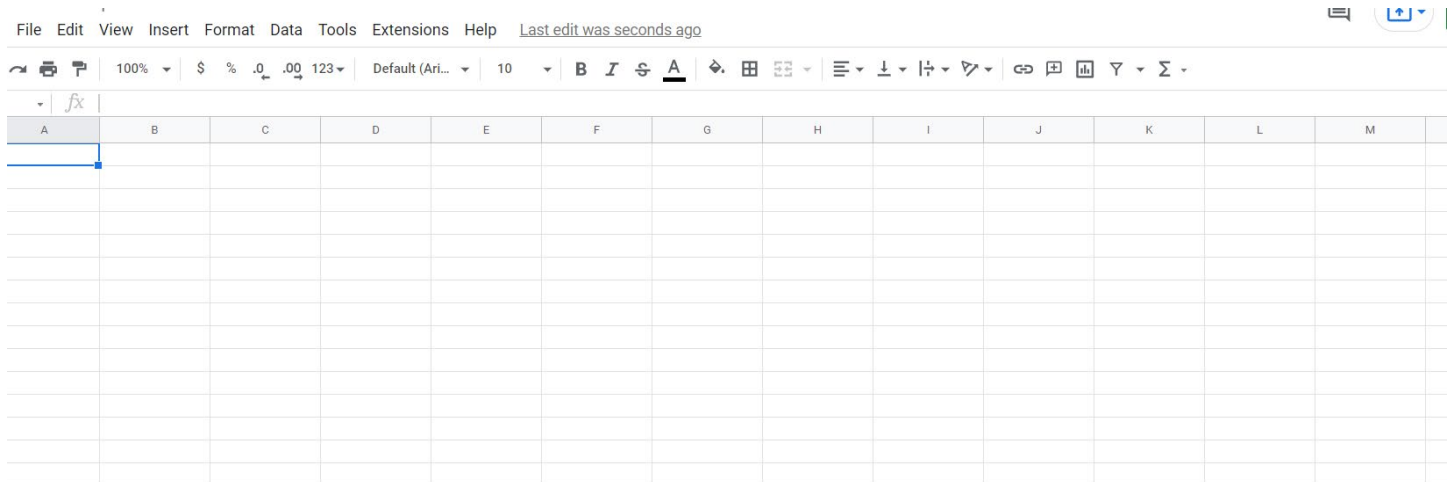

Try Sheets for Work

Go to Sheets

Don't have an account? [Sign up for free](#)

STEP2. Now we get again templates of google sheet and click on blank sheet .

STEP3. Now we paste the sample data to perform VLOOKUP on that data . This is a sample data .

id	name		
1	Jennifer		
2	Matt		
3	Jennifer		
45	Jennifer		
5	Jennifer		
6	Jennifer		
7	Jennifer		
8	Jennifer		

STEP4. Now we perform VLOOKUP on that data . first of all write all id separate from this. Write like this .Now on name(function) we apply our function .

id (function)	name (function)
1	
2	
3	
45	
10	
11	

STEP5. In this function we have to pass four arguments as like :-

1.) Search key :- this is on which we have to perform the function as like we have to perform on our id(function)

id	name	id (function)	name (function)
1	Jennifer	1	=VLOOKUP(F20
2	Matt	2	
3	Jennifer	3	
45	Jennifer	45	
5	Jennifer	10	
6	Jennifer	11	
7	Jennifer		
8	Jennifer		

2.) Range:- this is to select the whole table of data from which we implement the function

id	name	id (function)	name (function)
1	Jennifer	1	=VLOOKUP(F20,C19:D27
2	Matt	2	
3	Jennifer	3	
45	Jennifer	45	
5	Jennifer	10	
6	Jennifer	11	
7	Jennifer		
8	Jennifer		

By selecting the whole data and then we have to press the **F4**.

3.) Index:- this is to select the which coloumn of data you have to put on this function then we have to press “2” because I want to take the name from that data

id	name	id (function)	name (function)
1	Jennifer	?	=VLOOKUP(F20,\$C\$19:\$D\$27,2
2	Matt	2	
3	Jennifer	3	
45	Jennifer	45	
5	Jennifer	10	
6	Jennifer	11	
7	Jennifer		
8	Jennifer		

4.) Is_sorted:- write here is false , if data is not found is says N/A . as write false it automatically match the data from that table .

id	name	id (function)	name (function)
1	Jennifer	1	Jennifer
2	Matt	2	Matt
3	Jennifer	3	Jennifer
45	Jennifer	45	Jennifer
5	Jennifer	10	#N/A
6	Jennifer	11	#N/A
7	Jennifer		
8	Jennifer		

N/A means that data is not found according to id(function) is written as we see we have not 10 in base table

Learning outcomes (What I have learnt):

1. Learn about the google sheets and google form

Evaluation Grid:

Sr. No.	Parameters	Marks Obtained	Maximum Marks
1.	Worksheet		10
2.	Demonstration/Performance /Pre Lab Quiz		5
3.	Post Lab Quiz		5
